

Project Design Phase-I Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID53187
Project Name	Developing a Flight Delay Prediction Model using Machine Learning
Maximum Marks	4 Marks

Solution Architecture:

Technologies needed for Flight Delay Prediction Model:

Upon research we found that we need the following software technologies for systematic development and deployment of the project:

- Python
- Python Web Frame Works
- Python For Data Visualization
- Data Preprocessing Techniques
- Machine Learning
- IBM Cloud
- IBM Watson Studio
- Python-Flask
